Early payout fee (EPF) Not ascertainable

When you enter into a fixed rate loan contract, you are effectively locking in the loan interest rate offered to you for an agreed period of time (e.g. 5 years). If you decide to switch or payout your fixed rate loan before the end of your agreed period, you are effectively breaking that rate loan agreement, an EPF that could apply.

An EPF is not a penalty, it is not a fee revenue and WTB does not make a profit from it. If we lose money as a result of you breaking your fixed rate loan agreement, we charge an EPF using a reasonable cost-recovery calculation to recoup our loss.

Your fixed rate loan agreement is a contract and under the general principle of contract law, if you break a contract and the other party to that contract suffers a loss, you need to compensate that party for that loss.

We recommend that before you decide to break your fixed rate loan agreement, you should obtain an EPF "quotation" from WTB and then seek independent financial and/or legal advice. It is also important to note that the markets are unpredictable and interest rates can change. Therefore, an EPF quotation is valid only for the day it was quoted.

Calculation of EPF Not ascertainable

The Australian Financial Complaints Authority (AFCA) has assessed the methodology to fairly and reasonably estimate break costs on fixed rate loans and released a fact sheet titled 'Breaking a Fixed Rate Loan' on their website. WTB's EPF calculation (outlined below) reflects this fair and reasonable methodology supported by AFCA.

When you take out a fixed rate loan, you are effectively locking in your interest rate (i.e. your funding costs) for an agreed period of time. WTB as an intermediary borrow funds from savers and investors in the economy and on lend these funds to you (borrower). As you have fixed your funding costs for an agreed period of time, we will also seek to fix our funding costs for a similar period of time to protect WTB against future interest rate movements.

If you decide to break your fixed rate loan agreement, we also need to unwind our fixed rate funding. In order for us to reasonably calculate whether or not we have made a loss, we compare the movement in the wholesale market swap rates (swap rates) between two points in time (i.e. point one is the swap rate for the agreed fixed rate period when you take out your fixed rate loan and point two is the swap rate for the remaining term of the rate period when you break your fixed rate loan).

Mortgage loans funded under our securitisation program, the following additional fees and charges will apply:

Mortgage Settlement Fee	\$275
Mortgage Discharge Fee	\$550
Partial Mortgage Discharge Fee	\$275
Mortgage Substitution Fee	\$275
Mortgage Top Up Fee	\$275

All of these fees and charges are inclusive of GST and are paid to our securitiser.
